

# BYODTV

Twinpeak's revenue-generating television service for ships

Passengers carry their hand held devices everywhere they go today. Now you can reach them at anytime, anywhere on board and deliver first class entertainment to their tablets and smartphones.

The BYODTV platform provides television channels, video-on-demand (VOD) movies and custom TV content for your BYOD (bring-your-own-device) passengers on cruise ships, private yachts, oil rigs, ferries, and commercial ships worldwide.

Our affordable solution works with a single server and satellite feed – no internet required, **available offline through local wifi.**

## BYODTV services include:

- Live TV
- Tourism channels
- Music
- Shopping
- Weather
- Movies
- Your own channel
- Casino gaming
- Travel
- Advertising

Connect your passengers to free and premium entertainment and cruise information anywhere on board.
